Number Bonds to 10.

- 0 + 10 = 10
- 1 + 9 = 10
- 2 + 8 = 10
- 3 + 7 = 10
- 4 + 6 = 10
- 5 + 5 = 10
- 6 + 4 = 10
- 7 + 3 = 10
- 8 + 2 = 10
- 9 + 1 = 10
- 10 + 0 = 10

These number bonds are to be learnt by heart - if your child can instantly recall the number pairs to 10 they will become speedier at mental maths.

READING SKILLS

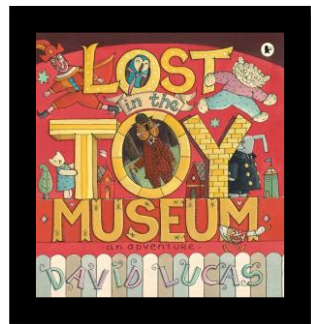

Please read your reading book with an adult at home. You now have your yellow reading record books to record in as well!

Adults - reading doesn't always have to be our school reading book - any books you read at home can be recorded - even comics and magazines count!

Ask your child questions about what they have read or stop them and get them to predict what might happen next.

Challenge - read to an adult every day!

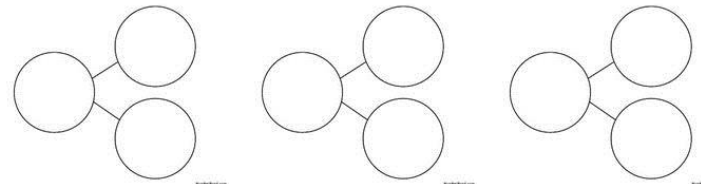

LITERACY

Our story this week is Lost in the Toy Museum. Can you create a story map that includes labels to retell the story?

Challenge – add an adjective to your label.

NUMERACY

Explore part part whole – think of a whole number to 10 and write it in the correct place then complete the part part sections for that number. *Challenge colour the whole number red and the part part numbers yellow*
